

DIRT

Damage Information Reporting Tool

DIRT TOOL RE- DESIGN

BE PART OF THE CONVERSATION!

The Damage Information Reporting Tool (DIRT) is a repository of securely and anonymously submitted data on excavation related damages involving underground utilities.

It is now easier than ever to submit single damages or near miss events using the redesigned DIRT.

DID YOU KNOW

Over 1,000 damages to underground infrastructure are reported each year in BC – that's 5 per day!

Many more damage incidents go unreported.

80% of damages cause a service disruption – in natural gas, electricity, telecommunications and other utilities.

NOT REPORTING?

The value to your organization CAN make a difference!

- Track events per day, month and year
- Identify damage trends, excavation issues and awareness needs
- Determine root causes of damages

Help BCCGA target damage prevention and safety solutions and messaging to benefit workers, the public and the environment!
